## 6 Add user codes (16 max)

Programming Timeout
During programming, if no button is pressed for five seconds, the system will time out (indicated by three beeps and a red flashing keypad), and you will need to restart the procedure.
A Make sure the door is open. Press the Program button once.

**B** Enter user code. A total of 16 user codes may be programmed.

Each user code must be a unique code between 4 and 8 digits.
C Press Lock button once.

D What lights and sounds does the lock produce?

One green flash with one beep	or	**Three red flashes with three beeps**
green — 1x		red — 3x
Programming was successful.		Programming was unsuccessful.
Make sure not to pause for more than 5 seconds during programming.

Make sure the user code is not a duplicate and that it is between 4 and 8 digits during your next attempt. Make sure the lock has room for an additional code. If all user code positions are filled, delete a code to make room for this one.

*Beeping sound will only be heard if switch #3 (on the lock interior) is in the on positon. See "Switches and Status LED Colors" on page 4.

Mastercode

For enhanced security, a mastercode may be used when adding and deleting user codes. For more information about the mastercode, download the Programming and Troubleshooting Guide on the SmartCode 10 page at www.weiserlock.com.

7 Test the lock (review normal operation)

Confirm that the code(s) added in previous step can unlock the door.

Locking the Door

Press Lock button once.
Unlocking the Door

Enter user code.

8 Re-key the lock (if needed) and install the battery cover

actual size **V**

A Re-key the lock (if needed).

a IMPORTANT: Remove battery pack before re-keying. **K**

b Re-key the lock to work with your existing key. See the supplied SmartKey Re-key instructions for more information. **H**

c Reinstall battery pack. **K**

B Install the battery cover.

a **M**

b **V** *(3x)*

Note: When the cover is removed, the turnpiece shaft can be used to manually lock and unlock the door.

System Alerts

Alert	Reason	Solution
Keypad flashes red three times with three beeps*.	One incorrect code entered.	Re-enter code.
	No user code programmed.	Program at least one user code.
	Programming timeout after five seconds.	Attempt programming procedure again.
	Unsuccessful programming.	
Keypad flashes red 15 times with 15 beeps*	Three incorrect codes entered within one minute.	Re-enter code after 60 second keypad lockout.
Keypad flashes red with fast beeping sound for three to four seconds.	Low battery.	Replace batteries.
Keypad flashes green with continuous beeping sound for two seconds.	Door jammed while attempting to lock.	Manually re-lock door. If needed, reposition strike.

*Beeping sound will only be heard if switch #3 is on.

Switches and Status LED colors

Switches

On Off

1 2 3 4
Status LED

Switch	Function
1	Door lock status LED blinks every 6 seconds
2	Lock automatically re-locks door 30 seconds after unlocking. Disabled if no codes are programmed.
3	Audio
4	Not used.

Color	Lock Status
Blinking green	Unlocked
Blinking amber	Locked
Blinking red	Low battery
Solid red	Door handing process did not work properly. See the online Programing and Troubleshooting Guide.

Troubleshooting

A complete Programming and Troubleshooting Guide is available on the SmartCode 10 page at www.weiserlock.com.

Deleting a single user code

Note: All codes may be deleted at once if the mastercode is enabled. For more information about the mastercode, consult the online Programming and Troubleshooting Guide.

1 Keep door open. Press Program button once.

2 Press Lock button once.

3 Enter user code to be deleted.

4 Press Lock button once.

5 Re-enter user code.

6 Press Lock button once.

If unsuccessful

Make sure to enter the same valid code in steps 3 and 5.

⚠ **Test code**

While the door is open, test the user code to make sure it no longer unlocks the door.

If no button is pressed for five seconds, the system will time out, and you will need to restart the procedure.

Factory Reset

A factory reset will delete all codes associated with the lock.

1 Remove battery pack.

2 Press and HOLD the Program button while reinserting the battery pack. Keep holding the button for 30 seconds until the lock beeps and the status LED flashes red.

Status LED

3 Press the Program button once more. In 20 seconds, when the LED flashes green and you hear one beep, the lock has been reset.

4 Perform the door handing process again to teach the lock the orientation of the door and add user codes to your lock.

Important Safeguards

1. Read all instructions in their entirety.
2. Familiarize yourself with all warning and caution statements.
3. Remind all family members of safety precautions.
4. Protect your user codes and mastercode.
5. Dispose of used batteries according to local laws and regulations.

⚠ **CAUTION:** Prevent unauthorized entry. Since anyone with access to the back panel can change the user codes, you must restrict access to the back panel and routinely check the user codes to ensure they have not been altered without your knowledge. The use of a mastercode can help protect your system's settings.

⚠ **WARNING:** This Manufacturer advises that no lock can provide complete security by itself. This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property. No lock can substitute for caution, awareness of your environment, and common sense. Builder's hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.
